

(a) CXL link latency

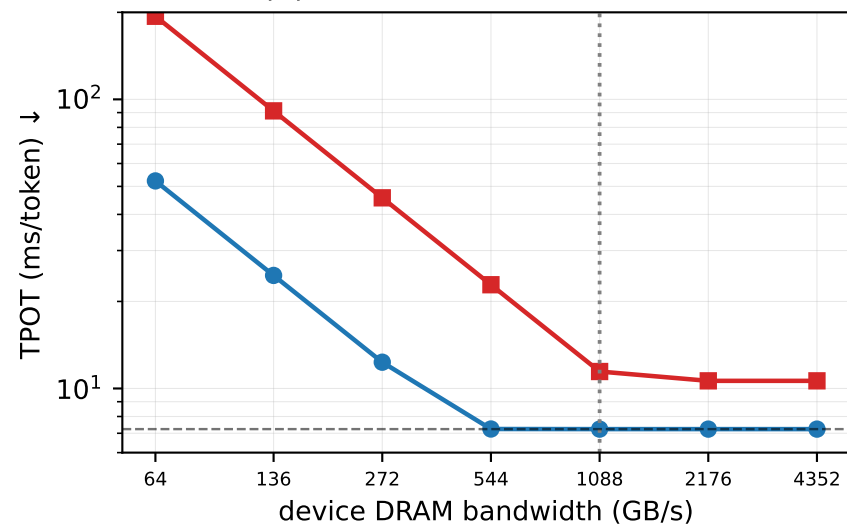

(b) CXL link bandwidth

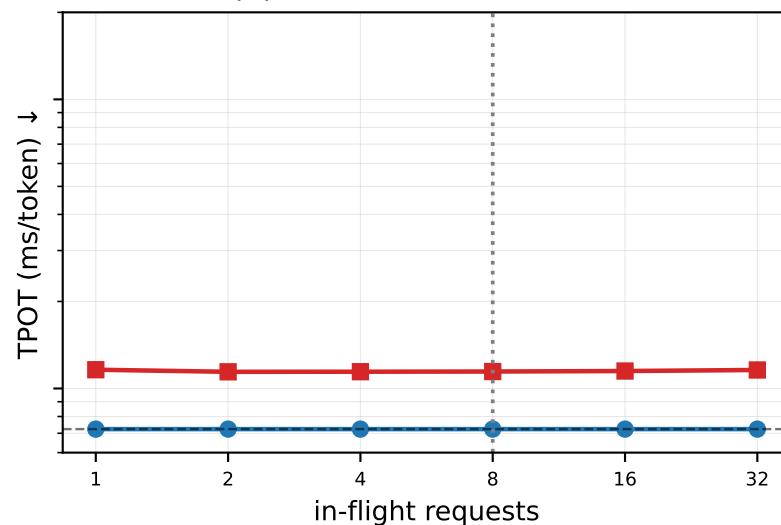

(c) NDP core throughput

(d) Device DRAM bandwidth

(e) NDP controller buffer

workload

- Uniform (short-KV)
- Uniform-long (long-KV)

gray : = paper default value
 black -- = HBM-bound limit
 (GPU floor CLoRA cannot beat)

Bottleneck knobs: CXL bandwidth,
 NDP throughput, device DRAM BW.
 Flat (non-bottleneck): CXL latency,
 NDP buffer.
